INTRODUCTION

The information presented in this publication is drawn from the vital records of the state of South Dakota. The data presented is for calendar year 1981.

The Department of Health files birth and death records for all events which occur in South Dakota, and transcripts of all marriages, divorces and annulments which occur in the state.

In addition to vital events which occur in this state copies of records are received from other jurisdictions when a resident of South Dakota dies in another state, or when a child is born in another state to a mother who is a resident of South Dakota. These copies are exchanged with other states on a cooperative basis for statistical purposes. All tables which are tabulated by place of residence include vital events to South Dakota residents, whether the event occurred in South Dakota or another state.

Resident births are tabulated by place of residence of the mother at the time of birth regardless of where the birth occurred. Resident deaths are tabulated by the place of residence of the deceased not where the death occurred. Marriages and divorces are tabulated by place of occurrence rather than residence.

All birth tabulations by race are by race of mother rather than race of child as shown in publications prior to 1979. This may cause some difference in the data when compared with race allocations in previous publications.

In 1980 the Ninth Revision of the International Classification of Diseases was used in the classification of causes of death. Care should be taken in comparing causes of death with previous years when the Eighth Revision was used.

The information included in this report has been limited to summary tabulations of general interest. The Health Statistics Program complies other and more detailed tabulations from vital records data. Information from these unpublished tabulations is available from:

Vital Records Program

DEFINITIONS

GENERAL

RACE

Race, as stated on certificates, is classified as White, Indian, Negro, or Other. Race of child is considered the same as the race of the mother.

RESIDENCE

Usual place of residence of person to whom event occurred. For births and fetal deaths residence is defined as the mother's usual place of residence.

OCCURRENCE

Place where the event actually occurred.

BIRTHS

BIRTH WEIGHT

Weight of infant at time of delivery (normally recorded in pounds and ounces).

CRUDE BIRTH RATE

Number of resident live births divided by total resident population X 1,000.

GESTATION PERIOD

Number of weeks elapsed between the first day of the last menstrual period and date of delivery.

LIVE BIRTH

A live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

LIVE BIRTH ORDER

Order number is equal to the number of previous live births plus the current birth.

LOW WEIGHT BIRTH

Birth where the birth weight is equivalent to 2,500 grams (5lbs. 8oz.) or less.

OUT OF WEDLOCK BIRTH

Birth where there is no marital tie between the mother and father.

OUT OF WEDLOCK BIRTH RATIO

Number of resident out of wedlock live births divided by the number of total resident live births for the same period X 1,000.

PREMATURE BIRTH

Same as LOW WEIGHT BIRTH.

DEATHS

CRUDE DEATH RATE

Number of resident deaths divided by total resident population X 1,000.

FETAL DEATHS

Death prior to the complete expulsion or extraction from its mother of a product of conception, having passed through at least the 20th week of gestation; the fetus shows no sign of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

INFANT DEATH

Death occurring to an individual of less than 1 year of age.

NEONATAL DEATH

Death of an infant less than 28 days of age.

UNDERLYING CAUSE OF DEATH

The condition giving rise to the chain of events leading to death. Classified according to the Ninth Revision of the International Classification of Diseases.

MARRIAGES AND DIVORCES

CRUDE DIVORCE RATE

Number of divorces and annulments occurring in an area divided by the total population of the area X 1,000.

CRUDE MARRIAGE RATE

Number of marriages occurring in an area divided by the total population of the area X 1,000.
